EUROPEAN COMMISSION

Brussels, 16.7.2025

COM(2025) 549 final

2025/0222(COD)

Proposal for a

REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

establishing the Erasmus+ programme for the period 2028-2034, and repealing Regulations (EU) 2021/817 and (EU) 2021/888

{SWD(2025) 550-551}
{SEC(2025) 547}

The Programme will contribute to putting into practice the principles of the European Pillar of Social Rights [19] and implementing the flagship initiatives of the European Skills Agenda [20] , to help individuals and businesses develop more and better skills and put them to use, including the Pact for Skills which aims to mobilise and incentivise relevant private and public stakeholders to partner up and take action for lifelong skills development. The programme will also be in line with the future European Strategy on vocational education and training, which aims to increase the attractiveness, excellence and inclusiveness of VET. Particular attention will be given in the Programme to promoting gender equality, for example the participation of girls and women in STEM, including through the Science, Technology, Engineering, Arts and Mathematics (STEAM) approach, also in line with the Roadmap for Women's Rights and the Gender Equality Strategy. The Programme will also address differences in relation to access and use by underrepresented groups, as part of a Union of Equality, in line with the Strategy for the Rights of Persons with Disabilities, the LGBTIQ Equality Strategy, the Anti-Racism Action Plan, and the Roma Strategic Framework for equality, inclusion and participation [21] . The proposal is also in line with the European Child Guarantee, and the EU Strategy on the Rights of the child, comprehensive framework for the protection and promotion of the rights of all children.

Community of Practice of Centres of Vocational Excellence
(CoP CoVEs)

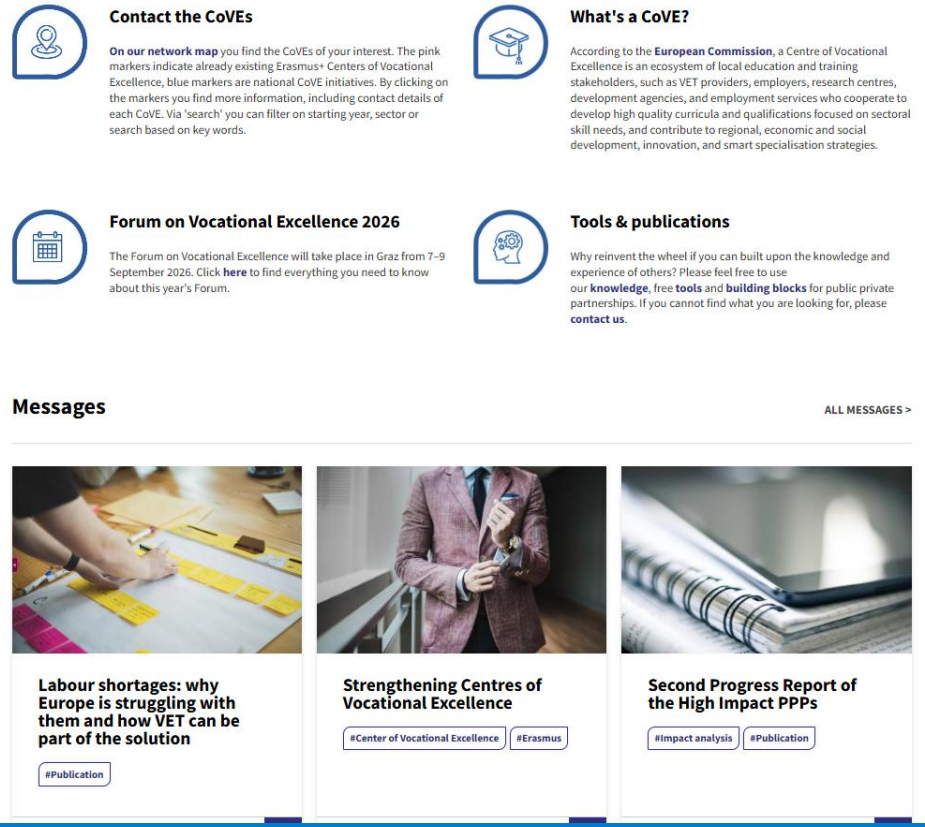

Welcome to the CoP CoVEs

In a world of ultra-rapid change, we need robust vocational and professional education to build a sustainable future. Through the Erasmus+ Centers of Vocational Excellence, educators, businesses and governments are working together to do so. Based on the believe that together we get further than alone, the project leaders of all Erasmus Centers of Vocational Excellence have joined forces in the Community of Practice of Centres of Vocational Excellence (CoP CoVEs). In this community they share experiences, inspire each other and jointly try to find solutions for common issues they encounter while implementing the Centres of Vocational Excellence.

By doing so, the project leaders are supporting each other and no one has to reinvent the wheel. The CoP CoVEs is a bottom up initiative by and for the CoVE project leaders and participation is voluntary. We are more than happy to welcome project leaders of future Erasmus+ Centres of Vocational Excellence in their midst and to share experiences of the existing CoVEs. The project leaders aim to meet once a year face to face during the Forum on Vocational Excellence and have monthly online thematic discussions, based on the needs of the project leaders. The Community of Practice is independent and self-sustaining, based on the voluntary contributions of its members. Furthermore, the Community of Practice is working closely with other stakeholders and policy makers in the field of VET and higher education.

If you like to know more about the individual Centres of Vocational Excellence, browse the network map on this page and follow the Community on Linkedin, where we share the updates of all Centres of Vocational Excellence

Contact the CoVEs

On our network map you find the CoVEs of your interest. The pink markers indicate already existing Erasmus+ Centers of Vocational Excellence, blue markers are national CoVE initiatives. By clicking on the markers you find more information, including contact details of each CoVE. Via 'search' you can filter on starting year, sector or search based on key words.

What's a CoVE?

According to the **European Commission**, a Centre of Vocational Excellence is an ecosystem of local education and training stakeholders, such as VET providers, employers, research centres, development agencies, and employment services who cooperate to develop high quality curricula and qualifications focused on sectoral skill needs, and contribute to regional, economic and social development, innovation, and smart specialisation strategies.

Forum on Vocational Excellence 2026

The Forum on Vocational Excellence will take place in Graz from 7–9 September 2026. Click **here** to find everything you need to know about this year's Forum.

Tools & publications

Why reinvent the wheel if you can built upon the knowledge and experience of others? Please feel free to use our **knowledge**, free **tools** and **building blocks** for public private partnerships. If you cannot find what you are looking for, please **contact us**.

From Idea to Action: Building Your CoVE

07-04-2025

#Center of Vocational Excellence

The purpose of our Community of Practice is to share working models that the Centres of Vocational Excellence actually used. Based on the experience of PoVE Water, we have added a new tool: the Roadmap to a Centre of Vocational Excellence. If you're planning to set up a Centre of Vocational Excellence (CoVE), or you're already on the path and want some guidance, this roadmap is a great place to begin.

The tool is designed to help understand what goes into developing a CoVE. From the early planning stages to building partnerships and ensuring long-term impact. It guides you through the process in clear, manageable steps and highlights key elements needed to build a successful CoVE.

As you go through it, the roadmap provides useful tools and straightforward explanations to help you make progress. It's a hands-on guide designed to support you throughout the entire process. Have a look at the roadmap if you're thinking of starting a CoVE or are already working on one. You can find it here.

Roadmap to a Centre of Vocational Excellence

Roadmap to a CoVE

#Tool #Center of Vocational Excellence

Knowledge on CoVEs

Introduction

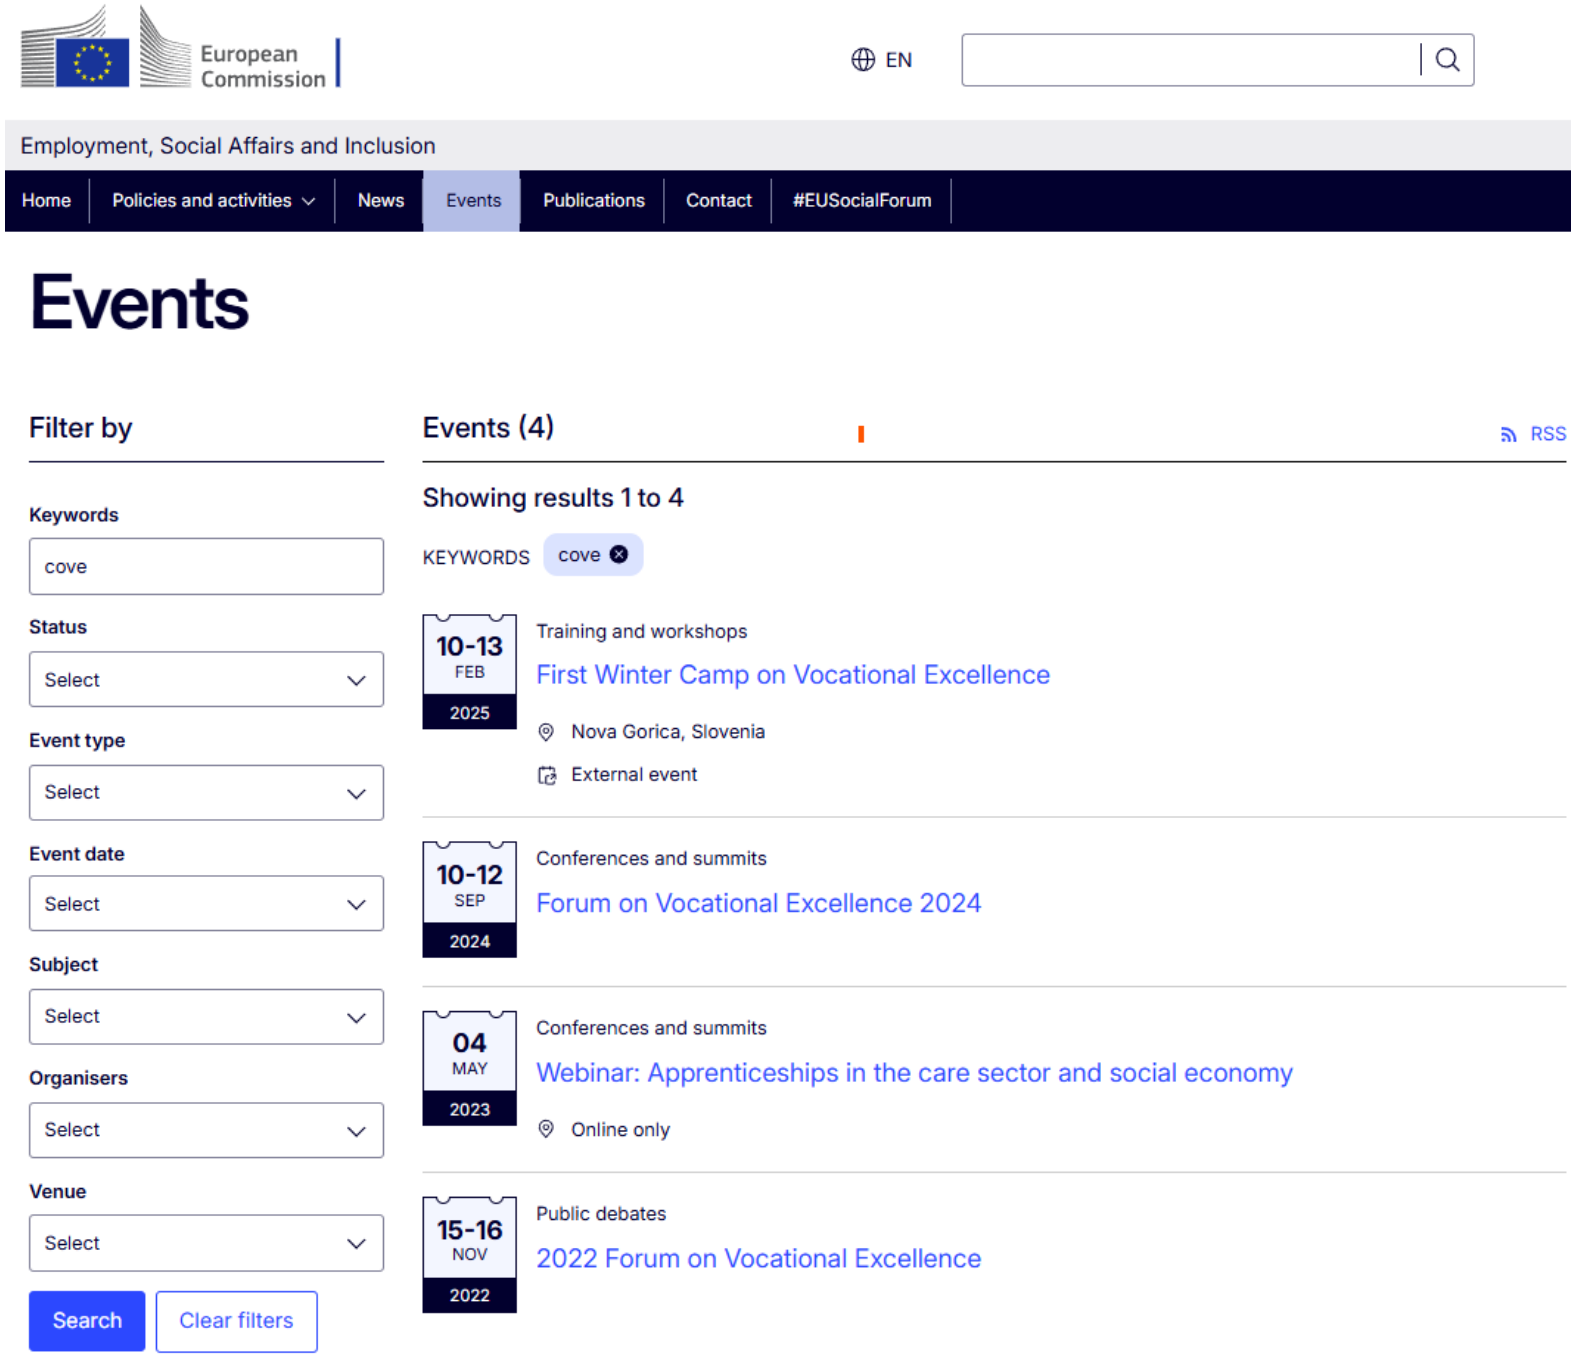

A Centre of Vocational Excellence (CoVE) brings together schools, companies and governmental organisations in a specific region and sector, the so-called skills ecosystem. Since each region is different, with its own issues, developments and cultural aspects, there is no one-size fits all solution. Instead, each Centre of Vocational Excellence has its own development process, tailored towards the skills ecosystem the Centre is operating in.

In order to provide guidance and structure, the Platform of Vocational Excellence Water has developed a roadmap towards a Centre of Vocational Excellence, outlining various phases all Centres will have to go through. On this page you find these steps, with tools for each phase. This roadmap is based on the experience of the Platform of Vocational Excellence during the development of our five region Centres of Vocational Excellence and the pan-European Platform of Vocational Excellence Water.

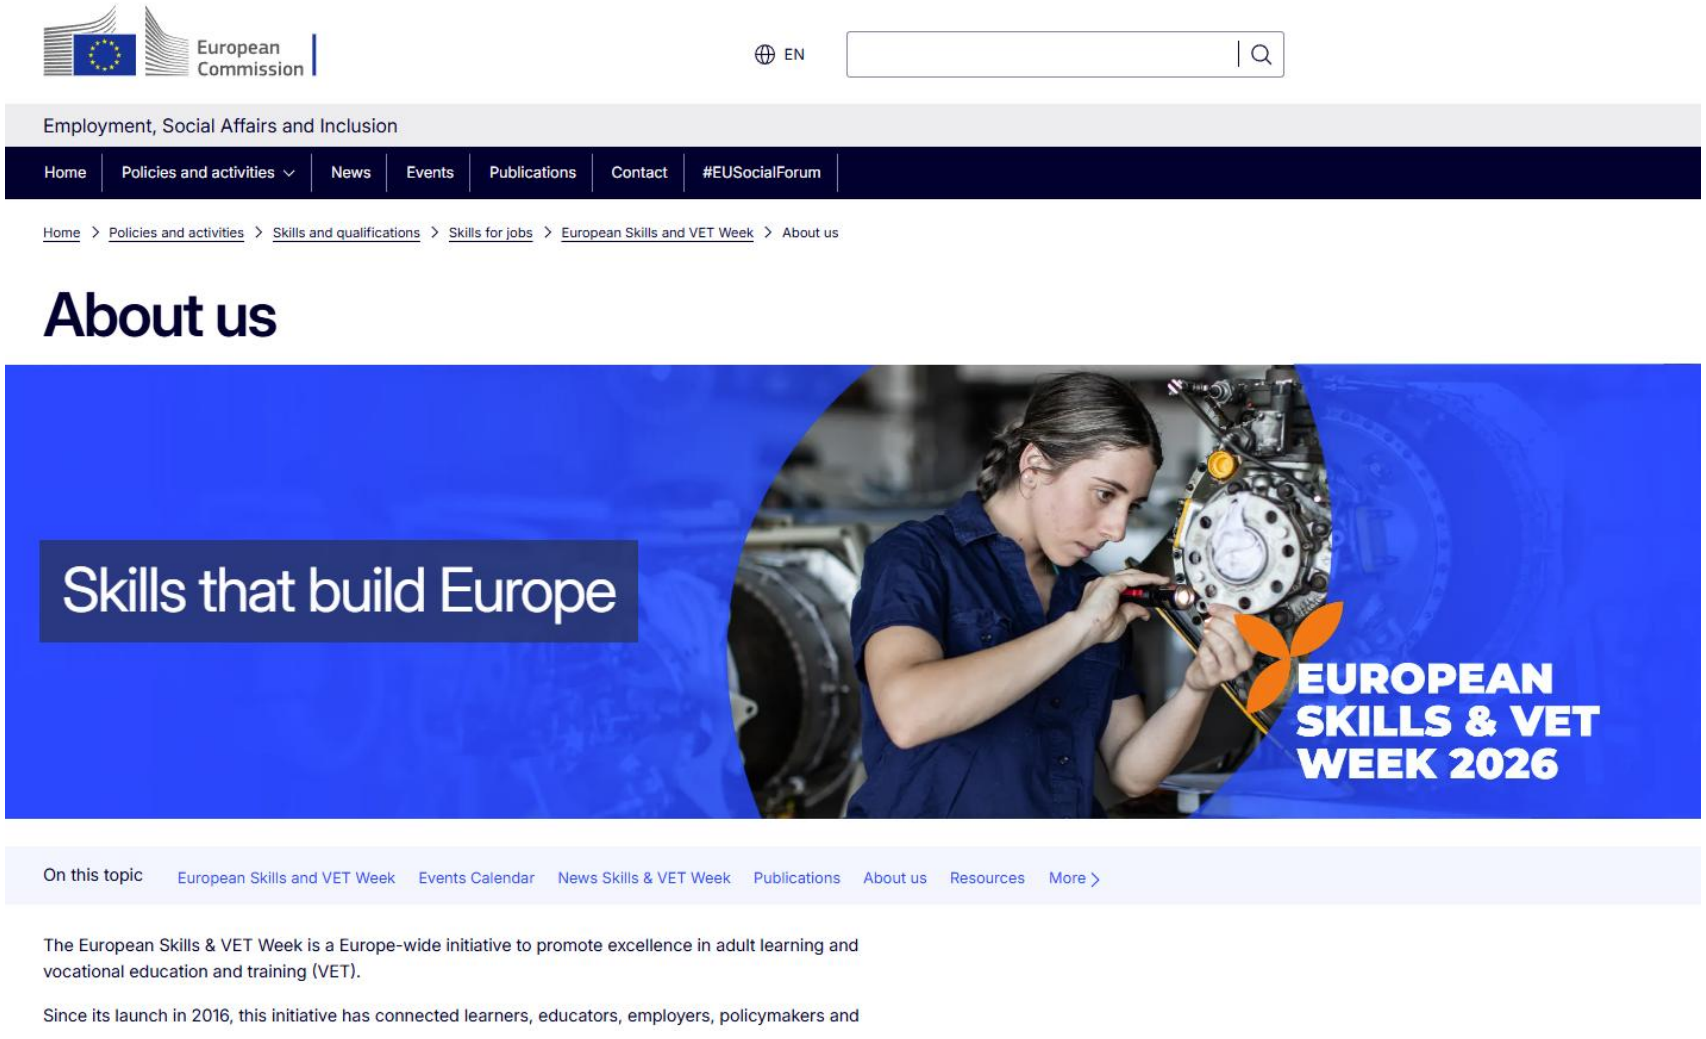

1. + Collecting ingredients for the CoVE
2. + Developing your Business Model Canvas and empathy mapping
3. + Start working on the proposition of your CoVE & define building blocks
4. + Matching your activities with your target groups
5. + Development of your CoVE
6. + Peer Reviews
7. + Continue developing your Business Model Canvas
